

Charles Melnarik

(2) advantage: easier for programmer to stop something together quicker

disadvantage: errors may occur without compiler catching them.

(4) the assignment and statement are closely related

(6) (a) sub1, sub1, main

(b) sub1, sub1, sub1

(8) sub1 a(sub1) y(sub1) z(sub1) x(main)

sub2 a(sub2) b(sub2) z(sub2) y(sub1) x(main)

sub3 a(sub3) x(sub3) w(sub3) y(main) z(main)
