Charlie Melnarik

2 A: You can Quickly access Parameters from subroutines.
   D: You cant really use recursion

4 If you use static in th Method declaration
   that will work

5 a 1 value = 2   list [1,3,5,7,9]
      2 value = 2   list [1,3,5,7,9]
      3 value = 2   list [1,3,5,7,9]
   b 1 value = 1   list [2,3,5,7,9]
      2 value = 1   list [3,2,5,7,9]
      3 value = 2   list [3,1,5,7,9]
   c 1 value = 1   list [2,3,5,7,9]
      2 value = 1   list [3,2,5,7,9]
      3 value = 2   list [3,2,1,7,9]

7 1 1,3
   2 2,6
   3 2,6
